

## **FICHA TECNICA OSCILACIÓN – ANTIVIBRACIÓN – SERIE AV**

The max. load on Y ÷ Y axes is %10 from Z ÷ Z ve X ÷ X axes.

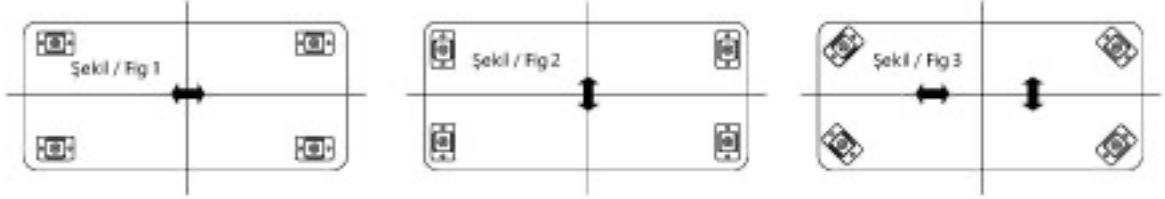

Momentary shock loads of 2,5 g in Z ÷ Z and X ÷ X axes ore admissible.

Type AV anti-vibration mounting

Type AV anti-vibration mountings are used for absorbing vibrations in generators, CNC machineries, pumps,crushers,mills,compressors and etc. They are designed also for damping solid-borne noise.

Type AV installation

- Under longitudinal dynamic forces,(Fig - 1)
- Under lateral dynamic forces,(Fig - 2)
- Under undetermined dynamic forces. (Fig - 3)
